- Owner/builder friendly

ADOBE SOUTH
 Specialising in
 Eco-Healthy Homes

Eco healthy houses designed by Adobe South and built by their owners; create healthy, safe, non toxic, energy efficient homes. The aim is to lessen the negative impact of hazardous chemicals on people and the environment and make the best use of sustainable, natural resources.

Good design factors include:

- Environmentally sound construction methods
- Use of nontoxic materials wherever possible
- Site specific designing (including climate and land constraints)
- Use of chemical-free coatings and finishings
- Alternative energy systems
- Ecologically sound effluent disposal
